

16th July 2019

Gabriel PRATS

This student has been attending the School of Physics and Astronomy of The University of Manchester for the academic year 2018/2019 under the ERASMUS student exchange scheme.

She attended and took written examinations (in January, May and June) or submitted assessed assignments in the following courses.

<u>Course No.</u>	<u>Course Title</u>	<u>Percentage</u>	<u>ECTS Credits</u>
MATH 20802	Statistical Methods	54%	5
PHYS 20252	Fundamental of Solid State Physics	81%	5
PHYS 20312	Wave Optics	58%	5
PHYS11000	Health and Safety Induction Course		
PHYS 20352	Statistical Mechanics	75%	5
PHYS 30672	Mathematical Methods for Physics	70%	5
PHYS 31692	Exoplanets	40%	5

Most of these courses consisted of 24 hours / lectures (+ any associated classes) and an examination of 1 hour 30 minutes duration.

It is relevant to note that the examination and assignments are the same ones taken by British students and that for these students an average of 70% or more would result in the award of a 'first class' degree; about 15% of students obtain such marks. 60% (or more) in examinations is achieved by about 50% of the students. The pass mark is 40%.
